

Jonathan Sicherman

Full Stack Software Developer

I'm a business-savvy, self-taught, full stack developer in the Greater New York City Area.

My coding journey began doing sales driven digital marketing work for small businesses and seed round tech startups. During the process, it didn't take me long to fall in love with programming. Now, I am looking to expand my horizons and do great work for an fast, focused, and innovative company around the New York Metro Area.
