Understanding of Product-Market-Fit · Customer Service Skills · Communication Skills · Adherence to Deadlines · Collaboration · Thoroughness

Experience

Full Stack Developer · Software Development

New York, New York

CREATIVE MINDS MEDIA GROUP - DIGITAL AGENCY

2018 - Present

- Understanding of basic computer science, OOP (Object Orientated Programming), web application software design, API implementation, along with my 10+ years of personal customer service and client work experience.
- Created unique highly scalable database models suited for high traffic websites within Django/Postgresql and Node.js Express/MongoDB code bases for an optimized end user experience.
- Ability to take projects from ideation to production stage.
- Implemented Google Maps, PayPal, and ActiveCampaign APIs within projects for clients.
- Experience engineering and building new components that included user product reviews, product order data lists, and create, read, update, delete functionality over both React/Node, and Django/Python code bases paired with other relational databases.
- Deploying web crawling spider scripts that scrub informational data for data analytic purposes.
- Overall familiarity with a list of other technologies like Ruby, Ruby on Rails, PHP, and MySQL.

Digital Marketing and Client/Customer Service

New York, New York

CREATIVE MINDS MEDIA GROUP - DIGITAL AGENCY

2016 - 2018

- Edited HTML and CSS website templates, while using the Adobe Creative Suite (Photoshop, Premiere) to edit media related material.
- Contributed on a project for a five million dollar in revenue per year business that resulted in the highest amount of product and tickets sold year to date in 2017.
- Designed and created landing pages, sales funnels, email campaigns, and social media posts ideal for prospect conversion.

Recent Projects

CRIBS NYC BROKERAGE

PYTHON · DJANGO · POSTGRES SQL · BOOTSTRAP

- Database models built within Django and Postgres SQL for apartment search, and individual room search.
- CRUD functionality built using Django Auth models and forms.
- Designed front end using bootstrap templates with custom HTML and CSS editing.
- Implemented Google Maps API so users can view closest trains, restaurants, and bars around apartment choices.

THE BAM BAGEL STORE

MERN STACK · MONGODB · EXPRESS · REACT · REDUX · NODE.JS

- E-commerce platform built for an Upstate NY bagel shop
- Implemented Redux as a state manager to deliver a fast front-end UI experience over React.
- Added and configured a PayPal API for online orders of product.
- Implemented a user product rating and comment system for reviewing products on the website.
- Creation of a custom admin panel for handling and receiving product orders.

EBAY SPORTSCARD SPIDER API

PYTHON · SCRAPY · PANDAS · BOOTSTRAP

- Developed an automated cloud-based API that scrapes eBay for sold sports card data and delivers it in JSON format.
- Used the framework Scrapy to scrub and present specific HTML data relevant for studying sold product data.
- Used the framework Pandas to manipulate and edit said data after collection.

Certifications

- Udemy - MERN STACK: MongoDB, Express, React, Node.js
- Udemy - Python Django Dev to Deployment
- Udemy - Bootstrap: HTML/CSS
